

RASAL JAMAN

Computer Engineering Student · Frontend Developer

📍 Kerala, India | 📞 +91 9946899892 | ✉️ rasaljaman15@gmail.com | 🌐 rasaljaman.me

OBJECTIVE

Motivated Computer Engineering diploma student seeking a web development internship to gain hands-on industry experience. Passionate about building responsive, performant web applications using React.js and Tailwind CSS — with real deployed projects, strong UI/UX sensibility, and a drive to write clean, maintainable code that delivers real value.

EDUCATION

Diploma in Computer Engineering

AKNM Govt. Polytechnic College Thirurangadi, Kerala

2024 – Present

Kerala State Board of Technical Education

TECHNICAL SKILLS

Frontend	Styling & UI	Backend & Tools
HTML5 · CSS3 · JavaScript ES6+ · React.js	Tailwind CSS · Responsive Design · UI/UX	Supabase · Git · GitHub · Vercel · Vite

Concepts: Object-Oriented Programming · Data Structures & Algorithms · REST API Integration · Version Control

FEATURED PROJECT

Progall.tech — Developer Tools & Resource Platform

 progall.tech

- Full-stack developer tools platform — curated resources, code snippets, and utilities in one fast, responsive interface built with React.js and Tailwind CSS.
- Supabase backend for real-time database, user authentication, and data management; deployed on Vercel with automated GitHub CI/CD pipelines.
- Modern dark-themed UI with glassmorphism effects, smooth transitions, and pixel-perfect responsive layouts — optimised for Core Web Vitals performance.

Stack: React.js · Tailwind CSS · Supabase · Vite · Vercel · JavaScript ES6+ · GitHub

PORTFOLIO & EXPERIENCE

- rasaljaman.me — Personal portfolio with a unique notebook/journal paper aesthetic: warm cream lined-paper background, chapter-based section navigation, orange accents, typewriter hero animation ("I'm a Vibe Coder"), and a dedicated cybersecurity terminal section with dark background and green monospace text.
- Hands-on experience with component-driven React architecture, state management, REST API integration, and UI/UX design across multiple deployed production applications.
- Leverages AI tools (Claude, ChatGPT, Cursor, Gemini) in daily development workflow — combining vibe coding with structured engineering for faster, higher-quality delivery alongside clean Git practices.
